

### Dr. Scott Terhune and Dr. Ranjan Dash Receive AHW Grant Award

Dr. Scott Terhune (PI), Associate Professor of Microbiology and Molecular Genetics, and Dr. Ranjan Dash (Co-PI), Associate Professor of Biomedical Engineering, have received a two-year, \$200,000 grant award from the Advancing a Healthier Wisconsin Endowment entitled, "Predictive Computational Modeling to Define Antiviral Efficacy." The project will develop computational models that aid in identifying key cellular markers for determining antiviral efficacy against Cytomegalovirus, which causes severe disease in immunosuppressed patients, is a leading cause of congenital birth defects, and is associated with diverse pathologies.
