

Position Summary

Assistant, Associate, or Full Professor

Purpose

The joint Department of Biomedical Engineering at the Medical College of Wisconsin and Marquette University invites applications for full-time tenure track/tenure eligible positions at the level of assistant, associate, or full professor. The Marquette University and Medical College of Wisconsin Department of Biomedical Engineering brings together the renowned engineering education and research of Marquette University and the innovative medical research and clinical practice of the Medical College of Wisconsin. This partnership provides an extraordinary foundation for those aspiring to join the next generation of biomedical engineers, scientists and physicians. We seek applications from individuals working in the areas of cellular and molecular engineering, and high value medical devices that will complement our emphasis on Clinical and Translational Biomedical Engineering. Strong applicants in other research areas will also be considered for our rapidly growing department. The successful candidate will be expected to develop an internationally recognized research program and to participate in the teaching and service missions of the Department. We are especially interested in candidates who will provide inspirational leadership in research and teaching and who will engage in the collaborative opportunities created by the joint nature of the Department.

Applications including a CV, cover letter describing professional background, research directions and teaching statement will be accepted and reviewed on ongoing basis; however, preference will be given to applications received prior to March 1, 2017. For additional information please contact Andrew Greene, Ph.D. at agreene@mcw.edu. Apply online via MCW's career website: <http://www.mcw.edu/Human-Resources.htm>
