

Dr. Scheidt Receives NIH R15 Grant Award

Dr. Robert Scheidt, Professor of Biomedical Engineering, on his three-year, \$438,182 R15 award from the National Institutes of Health entitled, "Augmenting kinesthetic feedback to improve hemiparetic arm control after stroke." This project establishes a new line of research that will ultimately lead to novel technologies enabling many stroke survivors to improve motor control in the contralesional arm, thereby improving quality of life.
